*THE 5 STAR LEADER OF  
THE VALLEY*

## About Us

Our 50 bed facility provides rehabilitative services for patients with functional deficits as a result of medical procedures, debilitating illness, or injuries. Through our innovative rehabilitation programs, we help patients recover quickly and return home with a renewed sense of self-sufficiency.

We specialize in physical and occupational therapy and offer speech therapy, IV therapy, wound care, pain management, complex post-surgical needs, and stroke, cardiac, and diabetic care.

## Visitation Policy

We understand that visiting your loved ones is an important part of every patient's emotional and psycho-social well-being. We continue to update our guidelines as allowed by the California Department of Health to help our patients maintain their connections in a safe environment.

Currently we offer several types of scheduled visitation, including window visits, in-person, indoor, and outdoor. Our staff also helps to facilitate FaceTime video chats between patients and loved ones using our in-house iPads.

## The 5 Star Difference

Rehabilitation facilities vary in the quality of care and services they provide to their patients. Reviewing health inspection results, staffing data, and quality of resident care are three important ways to measure the quality of a facility. A star rating is provided by MediCare for each of these sources and then combined to give an overall rating.

Lake Balboa prides itself on producing a great Quality of Care for our patients. We have had consistently good surveys, staff at high levels, and have good ratings for quality measures such as facility acquired bed-sores, pain management, and declines in health. This has resulted in an outstanding rating for our facility.

Lake Balboa Care Center is pleased to be an overall 5 out of 5 stars on MediCare.gov ratings

## Covid Protocols

***We are currently COVID-free and continue to practice our infection control protocols for the safety and peace of mind of our patients.***

- Hyper-hepa triple air filtration units place throughout our facility
- Weekly testing of staff and continued testing of patients including all new admissions
- Full droplet precautions (eye protection, N95 masks, gowns, gloves) for each patient interaction
- NO infection control deficiencies since 2014
- Passed with zero deficiencies several COVID-19 infection control surveys
- Ranked by Harvard Business School as the **#1 Skilled Nursing Facility in Los Angeles** to appropriately respond to the COVID-19 crisis
